LIGHTING

# Shine a different light on your lighting challenge

With 50 years of knowledge and experience within the lighting industry, we have grown into a leading international manufacturer of high-quality LED lighting products and solutions. It is, therefore, no coincidence that an increasingly large group of customers choose lighting products from our collection for their projects.

Whether it concerns the perfect illumination of products in a showroom, good lighting for a meeting room, or realizing a well-lit, safe entrance to a hospital. Our varied collection of more than 10,000 lighting products gives a completely new perspective on what is possible with light. Get inspired by our catalogue or view our collection.

## Characteristic products

1971

→ **Hobbylamp**  
Later followed by a magnifier version Sold more than 1,000,000 pcs

1974

→ **Stekkerspot**  
Luminaire to plug in a wallsocket

1978

→ **Clampspot E14**  
Followed by a range of ceilingspots Production of 50,000 units per week

1981

→ **Sweazy**  
Tablelamp E14

1984

→ **Gallo**  
Halogen table lamp G4

1985

→ **Quattro**  
Halogen spot AR50

1987

→ **Xantippe**  
Design by Ad van Berlo

1999

→ **Frame**  
GU10 spot developed for commercial market

2003

→ **Eyeleds**  
6.5mm floorLED to build in different flooring materials

2005

→ **SpotLED**  
First LEDspot in high volume. Developed for Philips.

2011

→ **SensorTune**  
50mm module with integrated PIR sensor

2012

→ **Fluxe 75**  
HV driverless downlight

2018

→ **Pointer**  
Antiglare pin hole spot

2021

→ **Linessa Air**  
Antiglare Panel serie incl. cold or hot air ventilation

2023

→ **Pointer Spot SM 2L**

## Reliable as a matter of course

Our lighting solutions excel in design and ease of installation, but also in operational reliability and service life. Illuxtron luminaires have an average lifespan of no less than 70,000 burning hours. Compare that with the meager 2000 burning hours of a traditional light bulb. For the average office environment, this means that you can enjoy your Illuxtron fixture for almost 20 years.

Just as you can rely on the excellent quality of our lighting solutions, you can also rely on our people as well. We don't like "fancy talk". What we promise, we do. If a problem should ever arise with your Illuxtron lighting, our engineer will do everything possible to find the cause and offer you a suitable solution.

Defective products are carefully analyzed by our engineers. The valuable insights this yields will be used to optimize the product even further. This prevents a similar defect in the future. As a result, we are able to achieve an exceptionally low failure rate of only 0,5%.

Our lighting products are made from high-quality parts and elements, sourced from renowned suppliers worldwide. We take care of the assembly ourselves at various local sheltered workshops. Finally, each product is subject to one last visual and technical inspection prior to dispatch. You couldn't wish for more certainty when it comes to quality.

## Sustainable down to the fiber

We believe it is important to work with respect for people, the environment, and nature. Every day we try to contribute to a better world in various ways. One way we achieve this is by exclusively developing lighting solutions based on energy-efficient LED technology.

Every day, we try to keep the impact on the environment in mind when making choices. We select our suppliers partly on the extent to which they use sustainable materials. Internally, we are doing everything we can to reduce our own carbon footprint even further. This year, our goal is to eliminate the use of plastic in our packaging process completely.

Contributing to a better world starts at the design table. When creating new designs and improving existing products, we are concerned about what will happen to our luminaires at the end of their life span. We strive for a collection that is as circular as possible.

## Inventive based on pure passion

If there is one aspect that predominates our family business, it is inventiveness. With half a century of experience in developing smart lighting solutions, pure passion for inventiveness is what drives us. It is without a doubt the common thread that runs through our company DNA.

Decades ago, Illuxtron came up with the idea of incorporating LED lighting on floors and other forms of ground cover. The introduction of a built-in motion detector in a lighting spot followed later and we are now working on a product that combines lighting with ventilation.

Whether it concerns the creation of new lighting applications or the substantial reduction of installation time; we try to shed new light on things that others take for granted. This focus on innovation is one of the most important reasons why many of our customers have been loyal to Illuxtron for decades.

## Human with an eye on each other

Together for the best performance  
It is our passion to develop and manufacture stylish and reliable lighting products. This is only possible thanks to the commitment and drive of our team. We, therefore, offer them the opportunity to bring out the best in themselves and each other, in order to develop even further.

Starting from the design by our engineers, then on to assembly in our sheltered workshops, and finally the shipping of our products. This exemplifies the way Illuxtron works.

After all, only together will we achieve the best result. This vision is also reflected in the way we cooperate with our customers. We firmly believe in partnership. Open, constructive, and with attention. Business certainly revolves around people.

**MIYO**  
Make it your own.

# Tailor-made lighting

## WHY MIYO?

As much as we want to offer a full package of fixtures, sometimes a project needs something more. We saw an increasing demand for luminaires that deviated from our standard range due to a different colour, shape, or design. Thus, MIYO was created, a department that listens to your wishes and customizes luminaires to fit your budget

There was an increasing demand for luminaires that deviated from the collection due to a special colour, shape or design. This is how this department was first created, a department that listens to your wishes and tailors fittings with competitive prices. The luminaires from the collection are assembled to order in our sheltered workshops and in-house workshops.

This allows us to choose from a large stock of lighting components and any of our existing parts can be used to create a brand new design. If special parts are needed, we can have them made quickly and easily by our large network of suppliers.

Minimum order of 50 units

Receive your quote within 48 hrs

Average delivery time is 6 weeks

## PROJECT SUPPORT

Bulk packaging, room-by-room labelling, and free GST18 plugs are all options for products. Illuxtron offers a new bulk packaging solution. This packaging is now available on request to be used for larger projects.

Generally, individual boxes are needed for stock-keeping, but for projects where larger numbers are needed, it is quicker to use the new bulk packaging. The bulk pack is applicable to all 75 models and has 48 pieces per box. When placing an order, please specify whether you would like bulk packaging or not. If you have an order of 36 pieces, we can cut the box slightly. This does not work so well with lower numbers.

For example, if you order 53 pieces, you will receive 48 of them in bulk packaging and 7 in individual boxes. Folding individual boxes flat is particularly challenging. This new packaging saves the installer a lot of time as well as being environmentally friendly.

ILLUXTRON

## LIGHTING KNOWLEDGE

We have the lighting expertise to develop a good lighting plan that will give your staff the greatest working atmosphere and/or effectively highlight your products.

## LIGHTING DESIGN

Illuxtron features a vast international dealer network that can help with lighting design and project management. Illuxtron can also assist our dealers when extremely complex lighting plans are required.

### FAST DELIVERY

Despite the market's current supply issues, Illuxtron has enough inventory to ensure a delivery time of 10 days (for orders of less than 100 pieces).

### 7-YEAR WARRENTY

Our guarantee is based on the luminaires burning continuously at a maximum ambient temperature of 45°. Illuxtron International's lighting products come with a 7-year manufacturer's warranty. When used as intended, Illuxtron International ensures that the products are free of material, design, and manufacturing flaws. This warranty is valid for products delivered after May 1, 2015 within the European Union and European Free Trade Association nations.

### 100% DUTCH

Our own R&D group creates the products and tooling from start to finish. We are intimately familiar with our products and are continually working to improve them.

### CUSTOMER SUPPORT

Communication with customers is the responsibility of our customer support team. This involves resolving issues, providing information, and simplifying transactions. Let us know how we can support you.

All products are developed by our own people and then assembled in various workshops by people with a disadvantage on the labor market. The range is aimed at the higher market segment and guarantees the use of high quality materials, resulting in a warranty of 7 years. 7 years warranty can be guaranteed.
