Datacenter solution:

# Linear Line

## LINEAR LINE

Special energy-efficient luminaire aimed at data centers. It can be mounted directly on a cable duct via a handy suspension system. As a possible pendant variant, it can also be attached to the ceiling with hanging wires.

## DESIGN

In a highly professional datacenter equipped with the newest servers you expect the design of the luminaire to be in line with this environment. Special attention has been made to all details of the linear luminaire to make sure that it has a high class appearance

## EXTREME DURABILITY

The products of Illuxtron differentiate from the rest of the market in terms of durability. Only A-Brand components are made and it is a company policy to bring only products to the market with a long lifetime and a 7 year warranty. Specially for datacenters Illuxtron took durability to the next level and did a lot of research to design a luminaire with an expected lifetime of more than 10 years.

## OPTICAL DESIGN

During maintenance it is important that the engineers have the best light quality available. Years of research created a new optical design where performance and esthetics will go hand in hand.

**FUTUREPROOF & ENVIRONMENT FRIENDLY**

Why change a complete luminaire when you can also change only the internal light module. Once every period servers needs to be replaced by new ones. During this short period the internal light module of the luminaire can be replaced quickly so that the luminaire will be updated to the latest technology. With this concept you never need to worry about renewing all your luminaires without the need of high skilled electrical contractors. In the meantime you produce less waste and contribute to the environment.

**EMERGENCY LUMINAIRE**

Stand alone IP65 luminaire with wide beam and 318Lm for 3hrs. Can be connected in the same way as the Linear Line to a cable trunking.

**TAILOR-MADE**

Could our product range match your requirements better? We will always gladly suggest a suitable product for your needs. We can make simple adjustments to existing features such as colour or size. However, we are open to more complex challenges too. We design fixtures specifically tailored to your requirements.

**Tailor-made Examples**

**ODION SPOT**

A cable basket holds the Odion Trackspot's head in place. It is a cheap way to light up your (industrial) project with a lumen output of 6300Lm.

**SUSTAINABLE LINEAR LIGHT**

At the end of its lifespan, this luminaire can be equipped with new technology. After retrofit a 7-year warranty can be offered again. The optics are available in different beam widths including an asymmetrical version.

## ILLUXTRON DATACENTER FLAT CABLE SYSTEM

The size of datacenters are becoming bigger and bigger. During building and installation many contractors are working at site under high stressed conditions. Illuxtron has designed a Plug & Play Flat cable system which give you the possibility to minimize installation

faults and save on installation time. The Flat Cable is the quickest option if you need to complete your installation quickly. The 5P tap off's can be assembled by Illuxtron at any location and any length you desire.

DATACENTER

**ILLUXTRON**<sup>®</sup>  
INTERNATIONAL

All products are developed by our own people and then assembled in various workshops by people with a disadvantage on the labor market. The range is aimed at the higher market segment and guarantees the use of high quality materials, resulting in a warranty of 7 years. 7 years warranty can be guaranteed.

MADE IN  
HOLLAND

7 YEAR  
WARRANTY
